**ASTM HEAVY METALS**

**TOTAL HEAVY METALS - COATINGS:**

The product shall comply with the requirements for the content of soluble heavy metals in accessible surface coatings as defined in ASTM F963-08 and ASTM F963-16, Specification for Toy Safety. The material may be evaluated by analysis of total element content screening to preclude the need for soluble analysis.

**Test Method:** Samples were digested and analyzed by Inductively coupled plasma - mass spectrometer according to ASTM F963-16 for total heavy metal content.
